

The background of the entire cover is a deep space scene. It features a dark blue to black gradient, filled with numerous small, distant stars. Several larger, more prominent stars are scattered throughout, each with a bright white core and a multi-pointed diffraction pattern. In the lower half, a large, dark, curved shape, possibly representing a celestial body or a nebula, is visible. A brilliant, multi-colored starburst or supernova-like event is centered on this curve, radiating outwards with a spectrum of colors including white, yellow, orange, and hints of green and blue. The overall effect is one of vastness and cosmic wonder.
